NPL Characteristics

Data Collection Form
(Version 2.0, October 1992)

SDMS DocID

564964

Site Name: Pontiac Enterprises LTD.

Region: \_\_I

State: RI

This form should be completed for all sites being proposed for addition to the NPL and included as part of the complete HRS package submitted to EPA Headquarters.

Office of Emergency and Remedial Response U.S. Environmental Protection Agency

#### **General Instructions**

The NPL Characteristics Data Collection Form is designed to standardize the site information collected for input into the NPL Characterization Data Base. This data base serves as a repository for general information about NPL sites and is used to respond to queries about NPL sites from a variety of sources including the general public, the press, other government agencies, and members of Congress. The primary source materials for completing this form are Regional site file documents (e.g., PA and SI reports), along with the site's HRS scoring package. Although much of the information needed to complete the form is expected to be available in the HRS scoring package, other sources in a site file may need to be consulted for some questions. If definitive data are not available in the site file to answer a question, estimates based on best professional judgment and other sources of information are acceptable.

As you complete the NPL Characteristics Data Collection Form, keep the following points in mind.

- ▶ Please complete the form in ink, and print legibly.
- Use the most accurate level of information available (e.g., SI-level information has priority over PA-level information).
- Try to use the listed response options when answering a question, and use "unknown" and "other" responses *only* when absolutely necessary. If, however, the available response options for a question are not adequate to accurately describe the site, use the "other" response and provide a brief explanation in the space provided.
- ▶ Use the margins to explain responses that do not match listed response options or to provide clarifying information. If you need additional room to clarify responses, use the space provided in Appendix C.
- Some questions may go beyond the scope of the HRS scoring package (e.g., may relate to pathways not scored). Answer these questions with the best information available, making reasonable "educated guesses" if necessary.
- ► "Current," as used in this form, should be interpreted as the general time period of HRS scoring package preparation.
- Principal contamination," as used in this form, should be interpreted as the contamination that is primarily responsible for a site's proposal to the NPL.

Please respond to *all* questions with the answer that you believe best represents the site conditions, given the information available at the time of HRS scoring package preparation. Do *not* skip questions except where specifically directed to do so.

#### 1. Basic Identifying Information

1.1	Site Name (as entered in CERCLIS): Pontiac Enterprises LTD.
1.2	CERCLIS ID Number: RID069857514
1.3	Name of Person(s) Completing Form: Dean D. Brammer Affiliation (agency/company): Roy F. Weston Inc. (START Region I) Phone Number: (978) 657-5400
1.4	Date Form Was Completed: <u>02/27/01</u> (mm/dd/yy)
1.5	Site Location:         City: Warwick
1.6	Site Coordinates (in degrees, minutes, seconds, and tenths of seconds):
	41 ° 43 ' 37.2 " North Latitude 71 ° 27 ' 57.6 " West Longitude
	If tenths of seconds are unknown, use "0" as a default value. If necessary, refer to Appendix E of EPA's 1991 PA guidance document for directions on how to determine coordinates.
1.7	ATSDR HEALTH ADVISORY. Has an Agency for Toxic Substances and Disease Registry (ATSDR) Health Advisory been issued?
	☐ Yes ■ No
	If yes, what was the date of issue? (mm/dd/yy)
1.8	HOW INITIALLY IDENTIFIED. How was the site initially identified to EPA? If this information is not available in the HRS scoring package, check the PA narrative or other parts of the site file. (check one)
	<ul> <li>□ Citizen complaint (including PA petition)</li> <li>□ State/local program</li> <li>□ CERCLA notification</li> <li>□ RCRA notification</li> <li>□ Other Federal program (specify)</li> </ul>
	<ul> <li>☐ Incidental (e.g., identified while discovering/investigating another NPL site)</li> <li>☐ Anonymous</li> <li>☐ Other (specify) Investigation of hazardous waste management practices at other locations with</li> </ul>
	same operator  Unknown
1.9	UNKNOWN SOURCE. Does the site consist exclusively of contaminated ground water or contaminated surface water sediments with <i>no identifiable primary source(s)</i> ? (check one)
	☐ Yes, ground water plume(s) ☐ Yes, surface water sediments ■ No
www.com/	

STOP HERE. If answer to question #1.9 is "Yes", proceed to Appendix A and complete the Supplemental Data Collection Form, then return to Section 6 (page 9) of this form. If answer is "No", continue to Section 2 of this form.

## 2. General Site Description

	□ Radioactive wastes □ Other (specify)		
4.5	SPECIFIC WASTE CONSTITUENTS. Which of deposited or detected on site? (check all that apply, an response to question #4.4)		
	☐ Asbestos		
	☐ Creosote ☐ Cyanides ☐ Dioxins (e.g., TCDD) ☐ Lead ☐ Pentachlorophenol (PCP)		
	Polychlorinated biphenyls (PCBs)		1
	Polycyclic aromatic hydrocarbons (PAHs)		1
	☐ None of the above		3

4.6	QUANTITY OF WASTE. What is the highest HRS hazardous waste quantity factor value among the pathways scored, regardless of which tier(s) (A, B, C, and/or D) was used in scoring? (check one)
· ·	□ 1 □ 10 ■ 100
	☐ 10,000 ☐ 1,000,000
4.7	WASTE ACCESSIBILITY. Is the waste on site currently accessible to the public (e.g., is site access unrestricted so people can potentially come into direct contact with contaminated materials)? Items to be considered when judging accessibility include, for example, presence or absence of a complete cover over the waste area and a secure fence around the site. A site with natural access restrictions (e.g., steep terrain) also can be considered inaccessible. Do not count on-site workers as part of the public when answering this question. (check one)
	☐ Yes ■ No
	□ Unknown
Der	nographics
score	this section, do not directly use the population factor values calculated in the HRS and entered in HRS esheets. Use actual (i.e., unweighted, unadjusted) population figures, which should be available in the supporting documentation.
5.1	NUMBER OF WORKERS ON SITE. What is the current number of workers present on site (not including workers involved in response activities)? (check one)
	<ul> <li>□ 0</li> <li>□ ≥ 1 and ≤ 10</li> <li>□ ≥ 11 and ≤ 100</li> <li>➡ ≥ 101 and ≤ 1,000</li> <li>□ &gt; 1,000</li> <li>□ Unknown</li> </ul>
5.2	DISTANCE TO POPULATION. What is the shortest distance from any source or area of contamination at the site to the nearest residential individual (include all persons occupying homes, apartments, businesses, or schools)? If contamination has migrated off site onto the property of a nearby resident(s), then check the box next to "0 miles." If the source or contaminated area is not clearly identified, use distance from the site property boundary. (check one)
	<ul> <li>0 miles (i.e., on site)</li> <li>&gt; 0 and ≤ 1/4 mile</li> <li>&gt; 1/4 and ≤ ½ mile</li> <li>&gt; ½ and ≤ 1 mile</li> <li>&gt; 1 and ≤ 4 miles</li> <li>&gt; 4 miles</li> </ul>

#### STOP HERE. Section 9 will be completed by a Headquarters QA reviewer.

**REVIEW OF COMPLETED FORM.** When you have completed Sections 1 through 8 of the NPL Characteristics Data Collection Form, please check to *make sure* that:

- (1) All questions are answered, except for ones that you were specifically directed to skip; and
- (2) All questions have been answered such that the responses are internally consistent, especially those in Sections 2 and 3. For example, if the site is the result of a spill or other one-time event, the responses for questions #2.4, #2.5, #3.1, and #3.2 should be consistent, while if the site is inactive or abandoned, the responses for questions #2.4, #2.6, #2.7, and #3.1 should be consistent.

Que	estions to be Completed by Headquarters QA Reviewer
9.1	Name of QA Reviewer
	Affiliation (agency/company):
	Phone Number: ()
9.2	Date QA Completed For This Form:/ (mm/dd/yy)
9.3	NPL Proposed Rule Number (i.e., NPL "Update" number):
9.4	U.S. Congressional District Number:
9.5	<b>DISCOVERY DATE.</b> What is the date the EPA Region was notified of the hazardous waste release/site? (should match site assessment CERCLIS information) If the day and/or month is unknown use "01" as a default value for these entries.
	/(mm/dd/yy)
9.6	DATE OF PRELIMINARY ASSESSMENT (PA). What is the date of the PA? (should match site assessment CERCLIS information) If the day and/or month is unknown use "01" as a default value for these entries.
	/(mm/dd/yy)
9.7	DATE OF SITE INVESTIGATION (SI). What is the date of the SI? (should match site assessment CERCLIS information) If the day and/or month is unknown use "01" as a default value for these entries.
,	/(mm/dd/yy)
9.8	RCRA SUBTITLE C STATUS. What is the RCRA Subtitle C status of the site? (check all that apply)
	☐ RCRA Subtitle C TSDF(s) that meets listing policy ☐ Bankrupt ☐ Loss of interim status facility (LOIS)

# Appendix A Supplemental Data Collection Form for Unknown Source Sites

This supplemental form should be completed *only* for unknown source sites (i.e., those sites that consist exclusively of contaminated ground water or contaminated surface water sediments with *no identifiable primary source(s)*). The questions and response options in Sections 2, 3, 4, and 5 of the standard data collection form that are not applicable to unknown source sites have been eliminated from this supplemental form. The general instructions for the standard data collection form apply to this form as well.

## Appendix B Definitions of Potentially Vulnerable Environments<sup>1</sup>

- Class I Ground Waters: Ground waters that are highly vulnerable to contamination and are either
  (1) irreplaceable as a source of drinking water to a substantial population or (2) ecologically vital.
- Karst Terrain: Areas where karst topography, with its characteristic surface and subterranean features, is developed as a result of dissolution of limestone, dolomite, or other soluble rock. Characteristic physiographic features present in karst terrain include, but are not limited to, sinkholes, sinking streams, caves, large springs, and blind alleys.
- Seismic Impact Areas: Areas where the probability is greater than or equal to 10 percent that the maximum horizontal acceleration in firm ground or rock at a particular site will equal or exceed 0.10 g (expressed as a percentage of the earth's gravitational pull (g)), within a time period of 250 years. Horizontal ground acceleration is defined as maximum change in velocity over time relative to horizontal movement of the earth's surface as measured at a particular point during an earthquake. This parameter is used to calculate the acceleration values for any particular area and is derived from equations relating to the area's geology and its past seismicity.
- Unstable Terrain: Areas capable of impairing the integrity of an engineered structure as a result of natural events or human activities. Relevant natural events include, but are not limited to, localized ground subsidence; differential settling, collapse and slope failure; sinkhole formation in karst terrains; liquefaction; and hydrocompaction. Relevant human activities include, but are not limited to, construction operations; flood controls; ground water pumping, injection, and withdrawal; resource extraction; storm water drainage; and seepage from human-made water reservoirs.
- Wellhead Protection Areas: Areas designated by the states to protect wells in recharge areas of public drinking water supplies, under authority of Section 1428 of the Safe Drinking Water Act.
- 100-year Floodplain: Any area that is subject to a one percent or greater chance of flooding in any given year from any source. For riverine systems, both the floodway and the floodway fringe are included in the 100-year floodplain.

<sup>&</sup>lt;sup>1</sup> To be used in responding to question #7.1.

#### Appendix C Additional Comments

Use this space to further clarify or explain responses to questions in the NPL Data Collection Form or Supplemental Data Collection Form For Unknown Source Sites. When clarifying or explaining a response, please make sure to provide the question number. Attach additional sheets if necessary.
